**Dear Ladies and Gentlemen,**

**It is with great pleasure that I welcome you to GID 2025, taking place on 17-18 June at the Sofitel Frankfurt Opera.**

Held under the timely theme “A Safe Harbour to Weather the Storm,” this year’s forum convenes a carefully selected global community of senior limited partners and general partners at the forefront of shaping the future of real assets.

Over the course of two concentrated days, GID 2025 provides an exclusive, closed-door environment to explore infrastructure investment strategies as the asset class gains prominence within diversified institutional portfolios. From capital deployment to long-term performance, discussions will delve into how leading institutions are responding to a rapidly evolving investment landscape.

The agenda features interactive, peer-level sessions conducted under Chatham House Rules, fostering open, nuanced dialogue and offering privileged insight into portfolio priorities, sector-specific dynamics, and global capital flows.

Thoughtfully integrated networking moments create space for authentic exchange and meaningful relationship building among senior decision-makers.

**Key themes for 2025 include:**

New opportunities and overcoming emerging hurdles

The energy transition and the integration of AI across infrastructure assets and investment processes

Financing strategies across the capital stack — both debt and equity

In-depth exploration of sectors such as renewables (including storage), transport, fibre, digital infrastructure, and emerging technologies

Regional perspectives from EMEA and North America, with an emphasis on cross-border trends and evolving regulatory frameworks

We look forward to welcoming you in June — to exchange ideas, gain exclusive insights, and uncover actionable opportunities aligned with your strategic investment objectives.

Best regards,  
Florentina

### Private Debt vs. Bank Loans: A Game of Leverage and Limits

Banks continue to finance the majority of the European market's needs—a stark contrast to the U.S., where private capital dominates. Yet private debt is gaining ground, driven by the evolving financing demands of the energy and infrastructure transition. Multi-sourced structures—blending bank facilities with institutional term loans—are becoming the norm. For debt investors and lenders, this shift opens up opportunities across the spectrum, from large-scale deals to the lower mid-market. As liquidity remains critical, the question persists: does current pricing adequately reflect underlying risk—and where can attractive returns still be found?

GID 2025 is Europe's most forward-thinking infrastructure dialogue, uniquely blending intimate networking, high-calibre investor discussions, and cutting-edge themes. Held in Frankfurt, it's where decision-makers from LPs, GPs, banks, DFIs, and developers shape tomorrow's infrastructure landscape.

### Why Attend?

- Candid Conversations, Not Keynotes – Each session is designed as a dialogue, not a monologue.
- Top-Tier Participants – Engage with global leaders from Aviva, CapMan, EBRD, Acciona, USS, and more.
- Strategic Themes – From energy transition and private debt to African megaprojects and green transport.
- Mid-Market & Core Plus Focus – Dive deep into the sectors and deal sizes often overlooked elsewhere.
- Purposeful Networking – Two focused days with curated participants—no expo halls, no fluff.

If you're looking to gain deeper insights, build stronger connections, and unlock more capital allocation opportunities, GID 2025 is the place to be.

**EXPERTISE DELIVERED AT ALL STAGES, SECURING YOUR PROJECTS FROM CONCEPT TO EXECUTION.**
