1. Structural changes in corporate borrowing: The shrinking role of banks

2. Structural changes: Comparing public and private markets

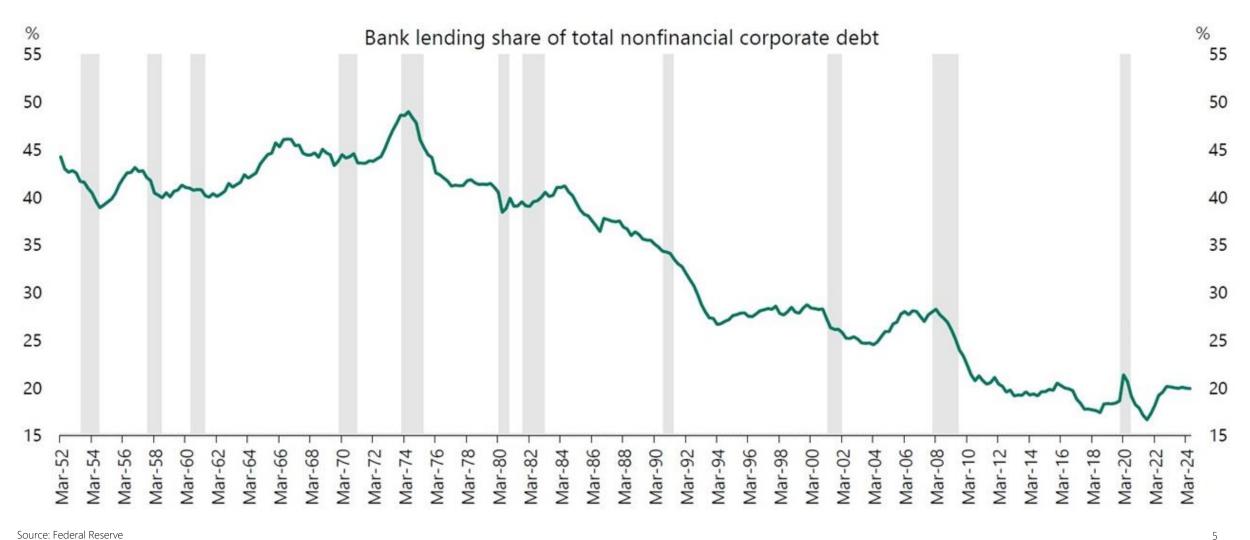

3. Cyclical changes: The impact of tariffs on corporate borrowing

4. Conclusion

How do companies borrow? The shrinking role of banks

# Banks playing a smaller role as providers of credit

### How do companies borrow?

**1. Bank Loans:** <u>Term Loans</u> – Lump-sum borrowing repaid over time. <u>Revolving Credit Facilities</u> – Similar to a credit card; draw as needed up to a limit. <u>Syndicated Loans</u> – Large loans funded by a group of banks.

**2. Bond Markets:** <u>Investment-Grade Bonds</u> – For companies with strong credit ratings. <u>High-Yield Bonds</u> – Higher interest, higher risk, for less creditworthy issuers. <u>Convertible Bonds</u> – Can convert into equity under certain conditions.

**3. Direct Lending:** Loans from institutions like Apollo. Examples: unitranche loans and mezzanine debt. Can be used when speed, flexibility, or confidentiality is important.

**4. Asset-Based Lending:** Loans secured by assets like inventory, accounts receivable, or equipment. Common in retail and manufacturing.

5. Vendor or Trade Credit: Suppliers extend payment terms. Short-term (could be 60 days) and often informal.

**6. Leasing or Equipment Financing:** Useful for capital-intensive industries. Types: finance lease, operating lease, sale-leaseback.

**7. Hybrid Instruments:** <u>Preferred Equity</u> – Has debt-like features (fixed dividends, senior to common equity). <u>Convertible</u> <u>Debt</u> – Debt with an option to convert into equity later.

**8. Securitization:** Turning receivables (e.g., mortgages, credit card payments) into marketable securities. Often used by financial or asset-heavy firms.

Examples of top issuers in investment grade and high yield corporate bonds:

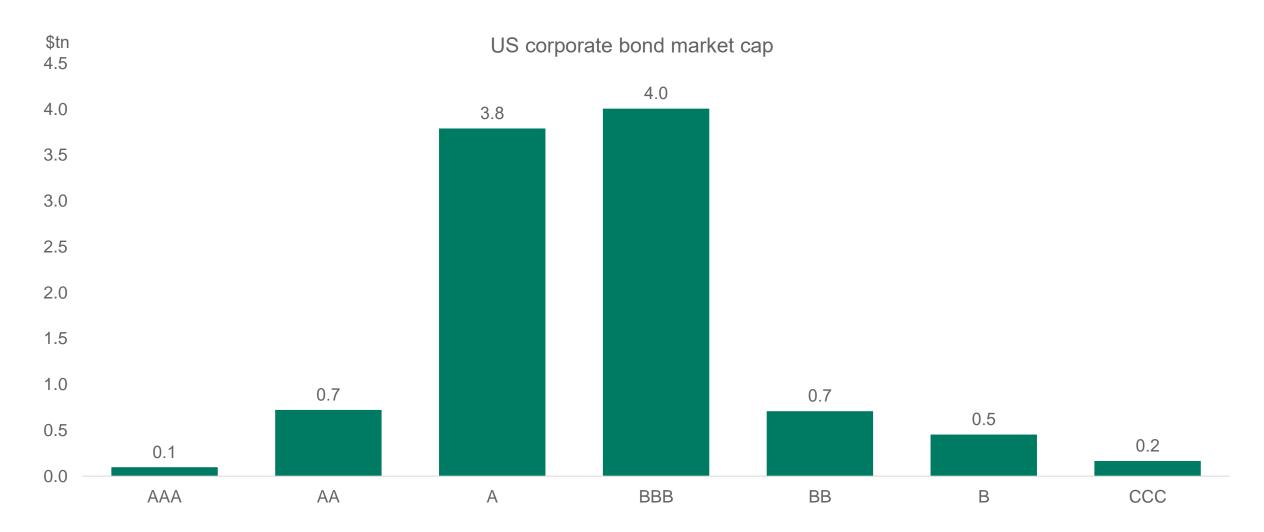

# **Investment grade:**

Bank of America, JP Morgan, AT&T, United Healthcare, Apple, Amazon, CVS, and Boeing

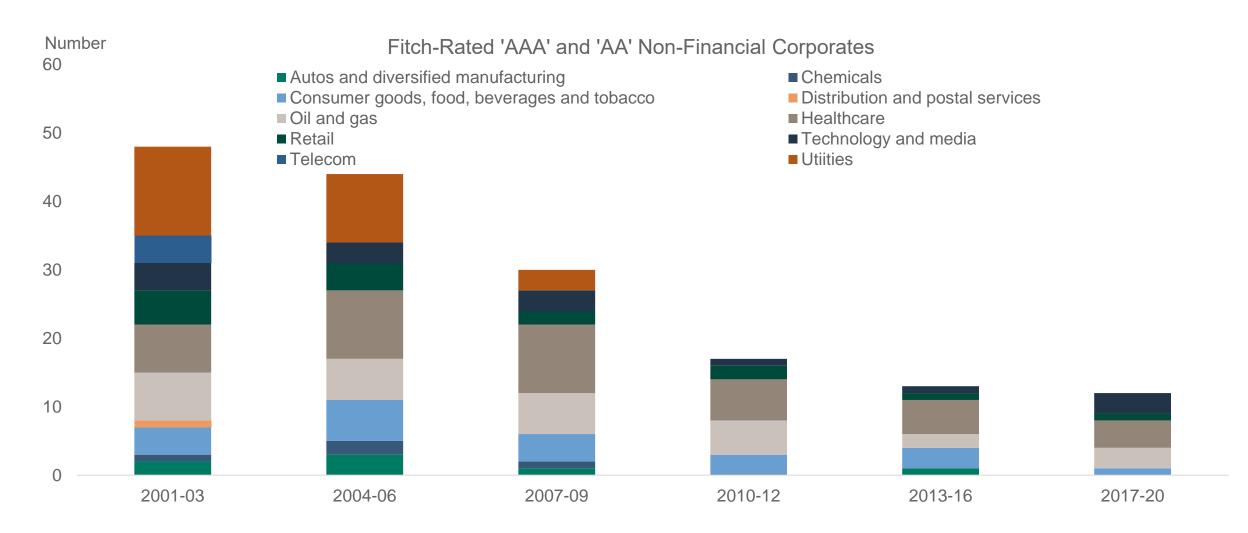

# High yield:

Sirius, Royal Caribbean, Walgreens, Univision, Carvana, Albertson, and American Airlines.

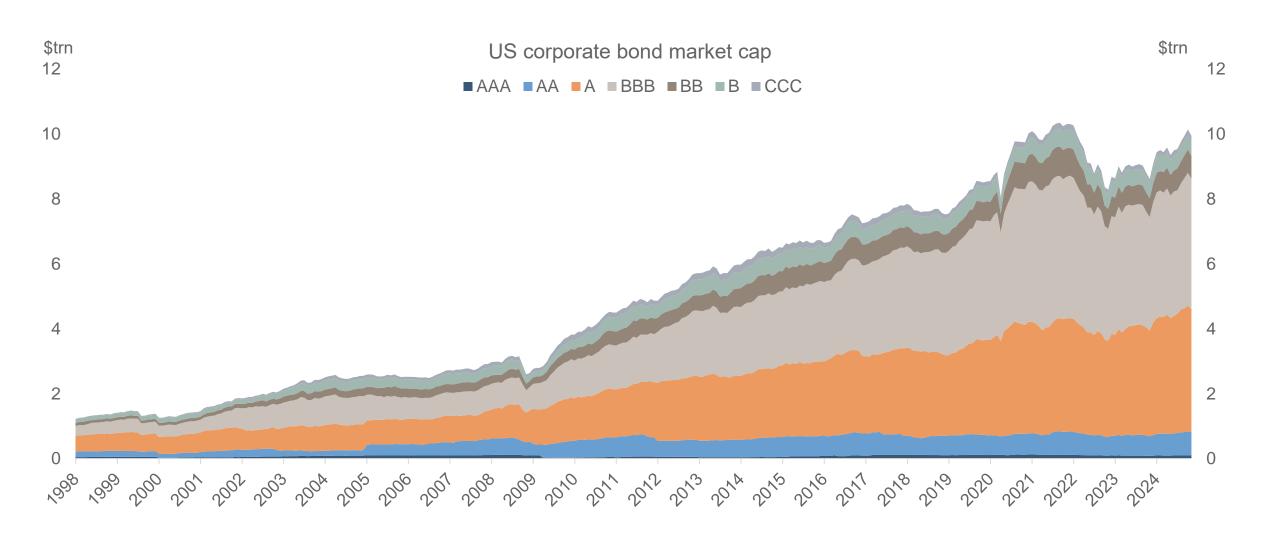

# Most corporate bonds outstanding are rated either BBB or single-A

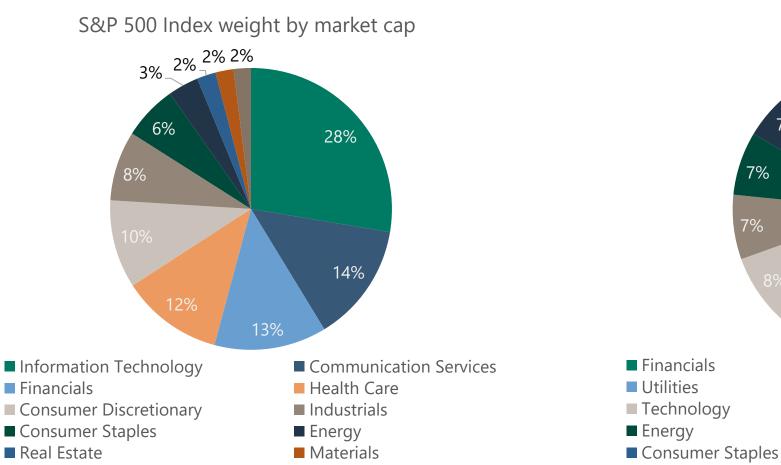

## Fewer and fewer corporate bonds are rated AAA and AA

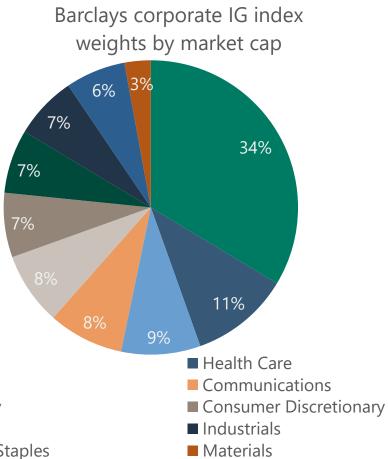

# Total market cap of US corporate bond markets: \$10trn

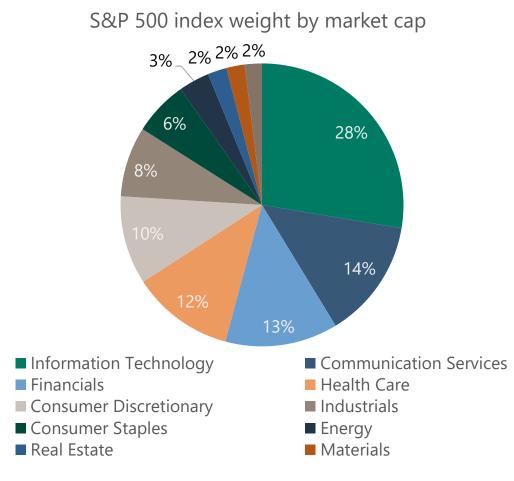

Big differences between weights in the S&P500 and the IG index

# Big differences between weights in the S&P500 and the HY index

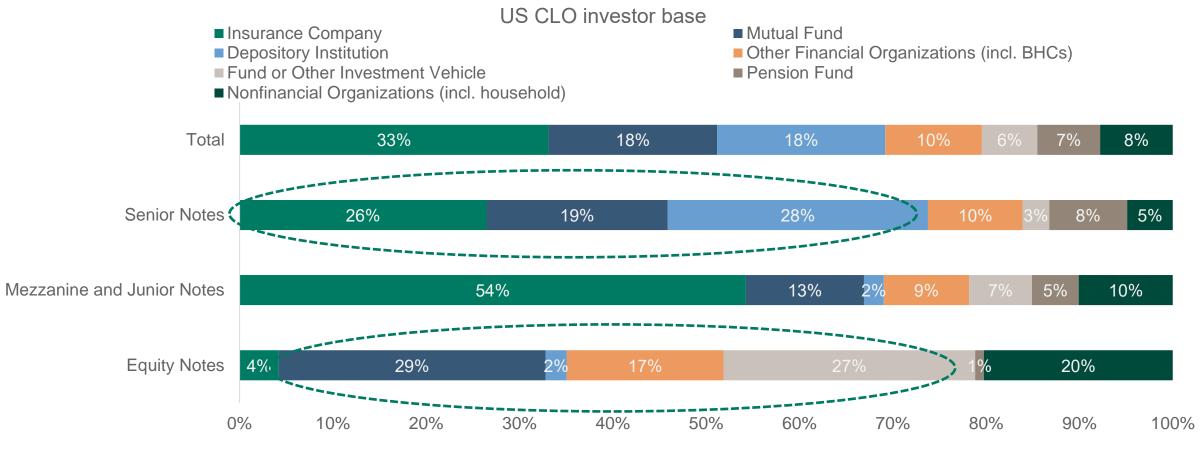

Bloomberg Barclays HY index weights by mkt cap

# Private credit as a percentage of total credit markets

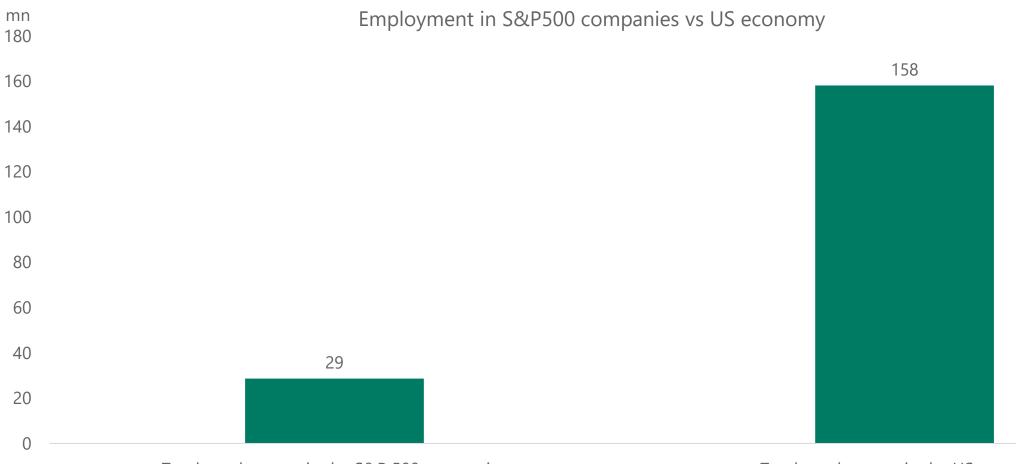

### US CLO investor base, by tranche

Comparing public and private markets: S&P 500 vs the rest of the economy

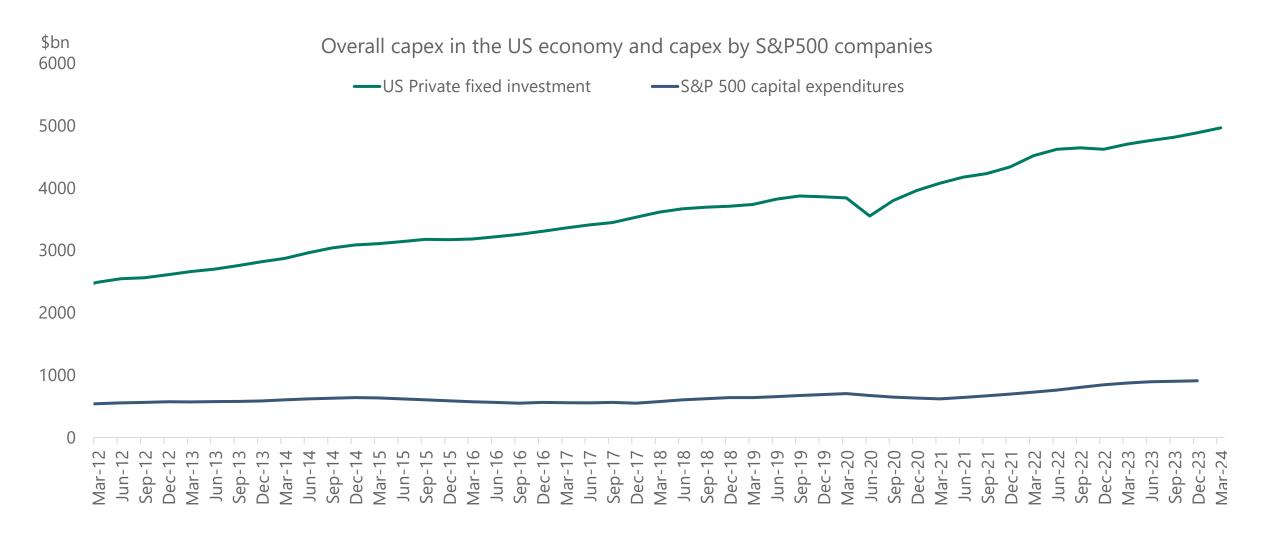

# Employment in S&P500 companies is 18% of total US employment

Total employment in the S&P 500 companies

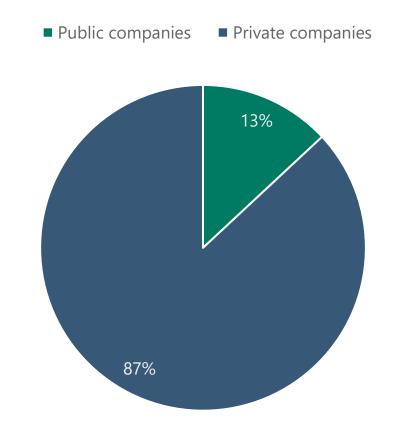

Total employment in the US economy

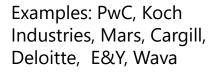

# Capex by S&P500 companies is 15% of total capex in the US economy

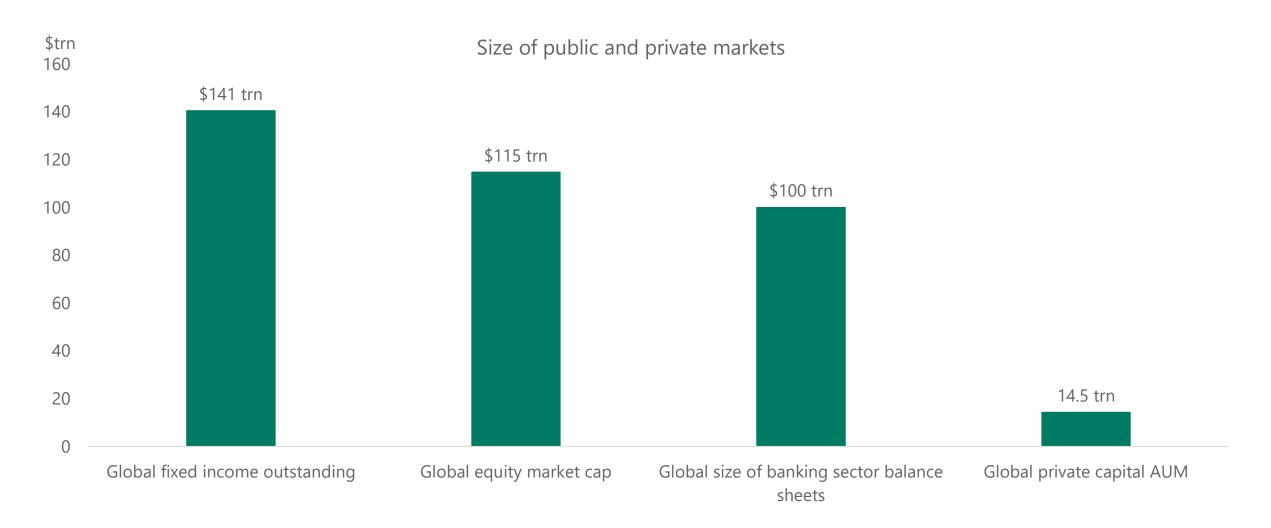

### US: 87% of firms with revenues greater than \$100mn are private

Share of public and private companies in the US, with revenue greater than \$100mn

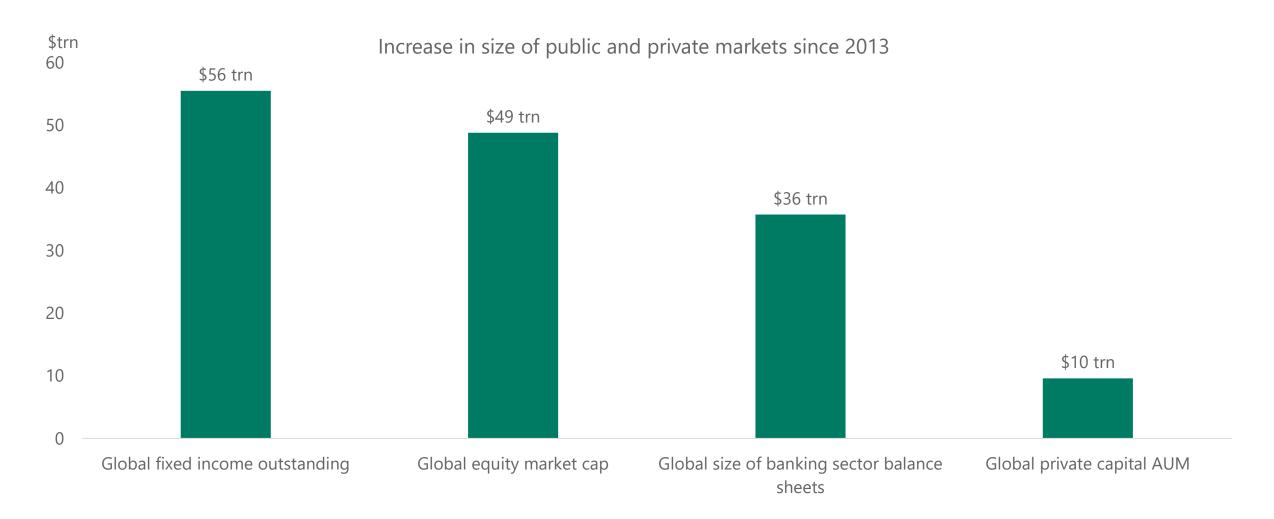

# Comparing public and private markets

# Comparing growth in public and private markets since 2013

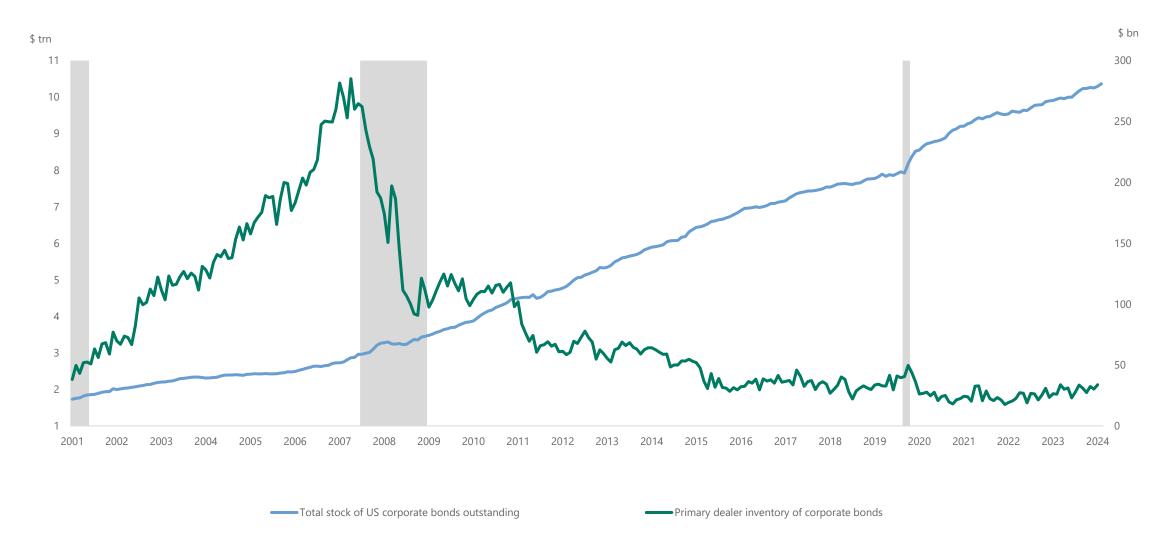

# The impact of tariffs on corporate borrowing

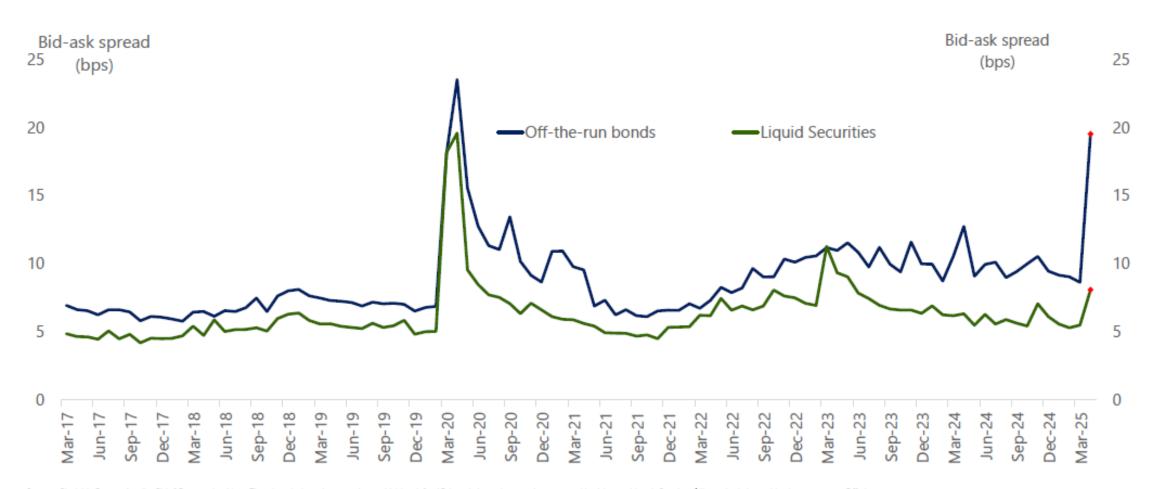

### Low liquidity in public credit markets:

Dealer balance sheets are a fraction of their pre-GFC size while the market has grown 3x

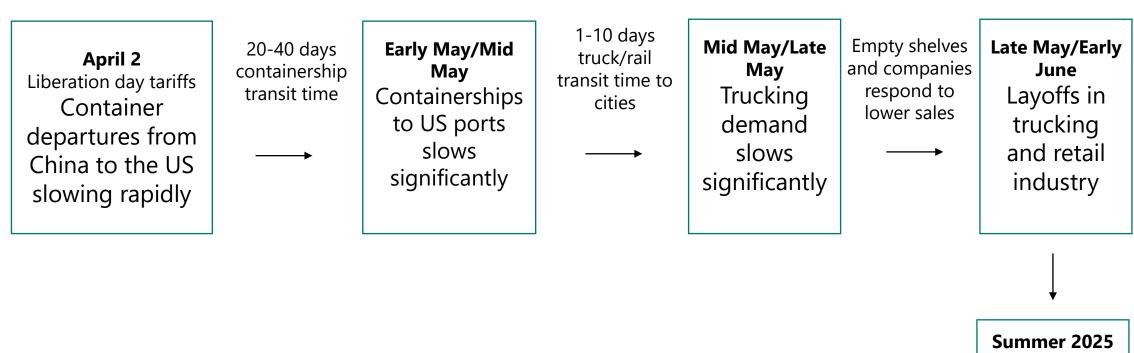

### Bid-Ask spreads widening in IG credit markets

Source: Shobhit Gupta, Apollo Chief Economist. Note: The chart below shows estimated bid-ask for IG bonds based on trader quotes. Liquid securities defined as \$1bn+ deals issued in the past year. Off-the-run bonds are those issued more than 2yrs ago with deal size <\$900mn (these bonds make up 50% of the IG market by count).
